Peppers	15						
Carrots	4						
Leeks	1						
Cantaloupe	2						
Sweet Potatoes	1						
Cabbage	4						
Pie Pumpkins	2						
Winter Squash	5						
Brussel Sprouts	1						

We grow a number of varieties of nearly every vegetable on this list. For example, even though “Peppers” shows up once, we grow over a dozen different varieties including green, red, yellow, orange, chocolate and purple bell peppers, multiple red sweet peppers and a wide range of hot peppers. The same is true for most veggie types.

Please be aware that the first few weeks may have a limited variety of produce. Variety improves as the season progresses. We are proud of our quality and the broad diversity we provide. However, some produce may be grown locally by other USDA Certified Organic Farmers if our supply is not sufficient.

PLUS: Miscellaneous harvests of unique trial varieties.
 Note that not all items are listed and not all items may be successful in the field.

Simple goodness down to our roots
